

An inspirational lecture at the University of Bradford by a world leader in their field:

Professor Steve Jones is Professor of Genetics at University College London.

His latest book is "Darwin's Island."

# Nature Nurture or Neither: The view from the genes.

*"Many people feel that their fate lies in their DNA; or that their lives and health can be divided into a segment called Nature (the genes), and Nurture (the environment). I will show that, from cats to mice to people, nature and nurture always work together and that it is meaningless to try and separate them."* (Professor Steve Jones)

The programme will start at  
4.30pm on Friday 25th September 2009.

The audience should be in their seats by 4.25pm. Visitors should be dropped off at the Richmond Building and make their way to the Horton Building Barn Lecture Theatre before 4.25pm. The event will finish before 6.30pm.

The lecture is ticket only. Free tickets can be obtained from [www.wegotickets.com/event/52523](http://www.wegotickets.com/event/52523)

This lecture is part of an International Darwin Conference organised by the University of Bradford and City of Bradford Metropolitan District Council. For further information see <http://www.brad.ac.uk/ihs/Darwin2009/>
